Goal: *open social scholarship*

Open social scholarship involves creating and disseminating research and research technologies to a broad audience of specialists and active non-specialists in ways that are accessible and significant

Theoretical roots of open social scholarship

- open access and open scholarship movements
- multidisciplinary digital humanities
- contemporary online practices
- public facing citizen scholarship
- scholarly communication

The Canadian Humanities and Social Sciences (HSS) Commons

An open online space where Canadian HSS researchers and stakeholders can gather to share information and resources, make connections, and build community

HSS COMMONS

hsscommons.ca

The Open Scholarship Policy Observatory

An online resource where we collect research, track national and international policy changes, and facilitate understanding of open scholarship policy across Canada and abroad

ospolicyobservatory.uvic.ca

Open scholarship network in Canada

- broader movement toward open scholarship → recognition that knowledge production, sharing, and access are changing
- collaborative work between many different partners and stakeholders in the Canadian digital research infrastructure landscape

Thanks!
